

"Cyclops II" Rail Puller, 25 Ton

Part no. 2310000C

The Cyclops II Rail Puller has positive camlock action to prevent slippage when pulling long lengths of rail. The unique cam design will accommodate up to ¼ mile rail lengths in rail profiles from 100 - 141 lbs. with a 25 ton capacity under load.

Features:

- Cast from high-strength alloy steel and magnetic particle tested
- Can be connected to a crane without a shackle.
