

Part no. 2310055A

IPS RailRunners are heavy-duty rail handling devices which are ideal for laying new rail. Designed to be used with wooden or concrete ties, its unique design allows units to be locked together into compact stacks to minimize freight costs and storage requirements.

Features:

Pillow-block
enclosed bearings
for increased
durability

Easily replaceable
heavy-duty rollers
and bearings

Also available in
flush, 'Street
Version'
