

Pole Tram Cart

Technical Data:

Make: IPS
Weight: 1877 lbs.
Dim.: 76" x 56" x 60"
(38" radius cradle)

- 10" machined solid steel wheels with bronze bushings
- Oversize axles for long term strength
- Heavy-duty reinforced plate steel cradle arms
- Long lasting, low maintenance design

Description: This heavy-duty log transport cart was designed for the movement of logs within pole processing facilities. Used in pairs, the rotating cradle accommodates curves in tracks during transport while moving log stacks through proofing chambers and to and from storage areas.

Axles and frame are designed with a drainage system so that the cart is self-lubricating when used with log immersion chambers for reduced maintenance.
